Zenith Media A/B tested various creatives to measure the impact of creative nuances such as the background location in a photo of a Honda Australia vehicle, the facial expression of a person as the subject, and more.

Their Taboola Native Advertising campaign led users to a landing page that hosts interactive features like the ability to sort through various Honda Australia car colors, the ability to spin a car for a 360 degrees view, and several other explorable options from design, performance, technology and safety.

Taboola Retargeting dramatically increases campaign performance by creating targetable audiences used to re-engage site visitors.
